PROFILE STATEMENT

I am a hard-working, ambitious and reliable person able to work in a dynamic and constantly changing business environment. I have learnt Java basics on my own. During my studies I have managed to become an organised and self-motivated person, capable of solving problems and delivering everything on time. My participation to a business project in my second year proved to be highly beneficial for my professional development. Not only did I improve my time management and organisational skills, but I also developed my communication skills, teamwork and problem-solving methodologies. I am currently doing a Full Stack Web Developer Course with the Learning People and Code Institute. I am doing projects taught by industry experts and I am mentored by a Senior Developer with more than 10 years' experience in the industry.

EDUCATION & QUALIFICATIONS

University of Greenwich – BSc Information and Communications Technology (1st class) 2015-2018

Relevant Courses:

**Programming Technologies,
Data, Information and Knowledge,
Web Systems Engineering
PPD3 Thematic Dissertation Project
Enterprise Architectures and Leadership
Systems Thinking
Strategic Analysis and Management**

I have studied BSc ICT at the University of Greenwich. The degree gave me a good theoretical and practical foundation of the use of ICT systems in business industry. The final project consisted of designing and developing a prototype of a small content management system (Drupal CMS) to meet the needs of the University of Greenwich and the associated agencies. Not only did it broaden my possibilities for future work placements, internships and job applications, but it also helped me to pick up transferrable skills for future use. These skills include good verbal and written communication in English, critical thinking, responsibility, teamwork, time management, business awareness and enterprise skills.

Gheorghe Lazar National College - GCSE (2011-2015)

3 GCSE´s A level in Maths, English and Biology   2015

The GCSE diploma gave me a good theoretical foundation for applying to university. It also broadened my prospects for the future.
